

I ask that the FCC reject the NAB's pretition 04-160. I write this because I find XM Traffic Reports to be extremely useful during my daily commute, and as a student I feel that taking away these reports would be a great hinderance to daily life. In addition, I find the traffic and weather reports on local stations severely limited in comparision to the XM reports and preventing my access to a better and more up to date traffic report would be extremely anti-competitive.
